

# Directional valve 3-way/2-position

# $Q_{max} = 60 \text{ l/min, } p_{max} = 350 \text{ bar}$

direct acting, spool type, pneumatical or hydraulical operation Type series: AODV-12-\_-3C-...

- Screw-in cartridge valve
- For cavity C1230
- All external parts zinc plated, chromited (CrVI-free)
- Installation in threaded port body type B1230
- Hardened precision fitted spool and sleeve provides reliable, long life
- Open center transition
- The non-corrosive piston assembly allows this valve to operate by air or any type of hydraulic fluid

When pilot piston is pressurized, the spool in this val-

ve is shifted and allows flow between ports 3 to 2 and

port 1 is blocked. This valve shifts in a open center po-

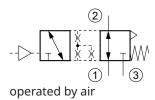

sition. Port 1 can be pressurized to 18.5 x pilot port

- Control spool is isolated from hydraulic fluid with high pressure seals

## Description

This unit is a three-way, two position, screw-in cartridge style, direct acting spool type, air or hydraulically operated, spring return, hydraulic directional control valve. When pilot piston is not actuated, this valve allows flow between ports 2 to 1 and port 3 is blocked.

## Symbol

operated by hydraulic fluid

pressure.

#### Dimensions and sectional view

#### Installation information

#### ATTENTION!

Only qualified personnel with mechanical skills may carry out any maintenance work. Generally, the only work that should ever be undertaken is to check, and possibly replace, the seals. When changing seals, oil or grease the new seals thoroughly before fitting them.

#### NOTE!

The seals are not available individually. The seal kit order number can be found in the chapter "Technical data".

## NOTE!

1) When fitting the screw-in cartridge valve, use the specified tightening torque. The value can be found in the chapter "Technical data".
